INVECTOR-DS CHOKE SYSTEM

• Invector-DS choke tubes combine muzzle-end threads and thin-wall construction for a longer, more gradual taper that produces extremely consistent, dense shot patterns that tighten consistently in reliable, evenly scaled steps.

• Muzzle threads minimize the flare at the end of the barrel for improved appearance, a faster swing and improved balance.

• A proprietary differential-banded brass seal compresses against the barrel wall when tightened to keep the choke tube threads clean and reliably.

• Standard Invector interchangeable choke tube technology with multiple cuts that compresses against the barrel wall that could damage the choke tube and the barrel.

• Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.

• See pages 171 through 175 for our complete lineup of choke tubes and choke tube wrenches.

INVECTOR-PLUS CHOKE SYSTEM

• The Invector-Plus interchangeable choke tube system works with Victor Pro and back-boring to offer consistent, dense shot patterns.

• The longer choke taper inside an Invector-Plus choke tube produces consistent patterns and is far more durable than choke systems in competitors’ guns, especially with steel shot.

• Invector-Plus eliminates gases slipping between the choke tube and barrel that could damage the choke tube and the barrel.

• Invector-Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.

• See pages 171 through 175 for our complete lineup of choke tubes and choke tube wrenches.

STANDARD INVECTOR

The Standard Invector interchangeable choke tube system is for non-back-bored Browning barrels and offers consistent, dense shot patterns. It’s far more durable than the choke systems found in competitors’ guns, especially with steel shot.

• Invector Plus is standard on 12 and 20 gauge Maxus, Citori, Cynergy, Silver, BPS and BT-99 models.

• See pages 171 through 175 for our complete lineup of choke tubes and choke tube wrenches.

MIDAS GRADE EXTENDED

• Extends beyond the end of barrel for easy removal and installation.

• Stainless steel with black oxide finish.

• Laser-etched gold-accent band.

• Minimum gap geometry plus high-resolution “RMS” finish reduce plastic buildup in bore.

• Produces tighter patterns than Browning Invector-Plus flush choke tubes.

• 28-gauge and .410 bore are Standard Invector chokes.

• Choke tube wrenches are listed on page 175.

• Flat choke tube wrench is not compatible with Midas Grade Extended choke tubes.

CHOOSE THE RIGHT CHOKE TUBE

The key to making a successful shot is selecting the right choke tube for a specific hunting situation or a challenging target presentation. Choose from Extra-Full constrictions for turkey and predators to pattern-spreading Timber n’ Teal tubes for close-in flooded timber waterfowling. You can trust that every Browning choke tube is made to the most exacting standards. They will provide you with perfect, dense shot patterns over many years of shooting and hunting.

INVECTOR-PLUS TUBE TECHNOLOGY

• Helically rifled to spin the shot charges and spread the pattern.

• Gas exits completely through tube.

• Area between tube and barrel stays clean.

• Invector-DS tubes have a special brass seal with multiple cuts that compress against the barrel wall and completely seats against gas leakage.

INVECTOR-DS EXTENDED

• Extended length tubes are easy to change and add approximately 1/4” to the overall length of the barrel.

• Proprietary differential banded brass gas seal eliminates residue buildup and makes chokes easy to remove and install.

• Integrated spring suspension holds the seal tight, yet allows expansion against the barrel wall for a perfect fit and a smooth transition for shot column entering choke.

• Gas is controlled at the interface between choke and where it seats in the bore.

• From Skeet to Full-choke, patterns tighten consistently and reliably.

• Choke tube wrenches are listed on page 175.

• Flat choke tube wrench is not compatible with Invector-DS choke tubes.
