PROTECTION SYSTEM

PRY-STOP END BOLTS
Superior to other bolt designs which allow the locking bolt support bar to bend. Pry-Stop End Bolts are over two and one-half times longer and attach to a high-strength steel angle iron that prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

OMNIBARRIER® LOCK PROTECTION SYSTEM
A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.

PRY-STOP CORNER BOLTS
Pry-Stop Corner Bolts (U.S. patent #8,767,827) provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the corner areas.

DUO-FORMED DOOR
The best Browning ProSteel safe door is made from multiple layers of steel formed together to provide superior strength, pry resistance and attack protection. Full second panel for outstanding strength. The door face is 1-1/16" thick.

FORMED DOOR
The Formed Door is engineered with a rugged steel face. Back and reinforcement panels provide excellent strength and attack protection compared to the competition.

REINFORCED DOOR FRAME
The door opening of the safe is strengthened by an integrated return flange to create added pry and attack resistance.

UNI-FORCE™ LOCKING SYSTEM
The finest Browning ProSteel safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.

FORCE DEFLECTOR™ LOCKING SYSTEM
The Force Deflector Locking System (U.S. patent #7,665,405) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.

180° HEAVY DUTY HINGES
Rugged exterior hinges allow the door to swing open 180° for unhindered access to the safe interior. Door locking bolts maintain security if the hinges are cut off. Fire protection is better with external hinges because no insulation is removed to accommodate the hinges.

FIRE PROTECTION

Stay Cool When it Gets Hot.
Browning ProSteel safes feature multi-faceted ThermaBlock fire protection technology. The three main components of ThermaBlock are: 1) our external door hinges that don’t require fire insulation to be removed 2) thicker sheets of fire insulation and 3) the interlocking arrangement pattern of the fire insulation that eliminates gaps. Together, these three pieces remove areas where heat can migrate into a safe and raise the internal temperature. The chart below demonstrates that a Browning ProSteel safe with ThermaBlock offers two to three times the fire protection of a comparable safe.

Don’t Cut Corners.
It may not seem to matter, but hinge type is crucial to fire protection. To accommodate an internal hinge, fire protection material must be removed where the hinges attach. In a fire, the unprotected hinge areas allow the internal temperature of a safe to rise to a significantly higher temperature than in a Browning ProSteel safe with external hinges and no gaps in the fire protection.

BROWNING PRO STEEL EXTERNAL HINGES
External hinges eliminate gaps in the fire insulation to block heat from entering the safe.

COMPETITORS’ INTERNAL HINGE
Internal hinges allow up to eight times more heat to radiate inside the safe through gaps in the fire insulation.

Browning ProSteel safe with 1-7/8” thick insulation after 100 minutes at 1680°.

Leading competitor safe with 1-7/8” thick insulation after 90 minutes at 1680°.
ProSteel safes lead the industry with advanced security measures that guard against break-in from drill, punch and pry attacks. Fire protection is also a priority, with multiple features that work together to increase protection from catastrophe and contribute to our honest and excellent ratings.

**OMNIBARRIER® LOCK PROTECTION SYSTEM**
A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.

**PRY-STOP CORNER BOLTS**
Pry-Stop Corner Bolts (U.S. patent #8,276,527) provide better protection than other pry defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the corner areas.

Unmatched Convenience and Storage Solutions.

Browning ProSteel safes have the most versatile interiors in the industry to store more of your valuables.

Beginning in 2018, Axis and CMS shelves and accessories are interchangeable for Browning ProSteel safes greater than 20 cubic feet in size.

Axis Adjustable Shelving

The exclusive Axis Adjustable Shelving (U.S. patent #D662341) is a completely customizable system with an array of shelves that can be configured to meet virtually every need. The Axis shelf is made from a single piece of sturdy steel. Covered in a soft, protective silicone rubber that is highly durable and designed to protect guns and valuables. It also adds a sleek appearance to the safe interior. Axis accessories, featured on page 111 are designed to easily mount to the solid steel shelf or barrel rack. (Compatible with safes that feature Axis Adjustable Shelving built in 2013 or later.)

CMS (Cantilevered Modular Shelving)

CMS shelves are constructed of wood, covered in soft carpet and built upon a tough steel frame. CMS borrows essential components from the patented Axis Adjustable Shelving (U.S. patent #D662341) to retain much of the adjustability of the higher-end system. Like Axis, CMS can be adjusted up and down, side to side, added and removed to fit a wide range of valuables. CMS (CANTILEVERED MODULAR SHELVING)

The Inside Advantage.

The patented DPX storage system (U.S. patent #7,409,790) is available exclusively on Browning ProSteel safes. This unequalled organizational tool allows long guns, handguns, shooting gear and valuables to be stored on the back of the safe door. The DPX Quick Access Barrel Rack puts long guns on the door for instant access and the available Scope Saver increases storage and protects optics. DPX pouches and pockets keep valuables and gear where they are easy to find and free up shelf space for even more items.

The Inside Advantage.

The patented DPX storage system (U.S. patent #7,409,790) is available exclusively on Browning ProSteel safes. This unequalled organizational tool allows long guns, handguns, shooting gear and valuables to be stored on the back of the safe door. The DPX Quick Access Barrel Rack puts long guns on the door for instant access and the available Scope Saver increases storage and protects optics. DPX pouches and pockets keep valuables and gear where they are easy to find and free up shelf space for even more items.

Quick Access Barrel Rack

Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

Mesh Pockets

See-through mesh pockets hold smaller items and make valuables fast and easy to visually locate.

Accessory Pockets

Accessory pockets organize items and offer quick access.

Scope Saver

The military-style MOLLE System straps on the DPX panel allow quick access to a full rack of long guns on the door back. The recessed panel protects scopes and increases gun capacity.

Stock Tray

The molded stock tray secures the stock in position and helps prevent rifles from coming in contact with one another.

How do Browning ProSteel Safes Hold 54% More Guns?

- Total capacity grows up to 54% in the Half Shelf configuration because there is a full rack of long guns on the door back.
- “Quick Access Guns” increase in both Half Shelf and All Gun configurations. These are guns on the front row of the safe body and the door gun rack and can be quickly accessed.

RSC rating ensures that a safe meets construction specifications and has passed a series of independent laboratory test attacks. Confidence in Browning ProSteel product leads to the best warranty in the gun safe industry — a lifetime warranty that covers attempted break in, break in, or fire. If one of our safes is involved in one of these situations and your homeowner’s insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. (Safe contents are not covered.)

AXIS and CMS/WARRANTY

Protection for a Lifetime.

RSC rating ensures that a safe meets construction specifications and has passed a series of independent laboratory test attacks. Confidence in Browning ProSteel product leads to the best warranty in the gun safe industry — a lifetime warranty that covers attempted break in, break in, or fire. If one of our safes is involved in one of these situations and your homeowner’s insurance policy does not cover the damage to the safe, ProSteel will repair or replace the safe. (Safe contents are not covered.)

How do Browning ProSteel Safes Hold 54% More Guns?

- The long gun capacity is a series of three numbers, for example 13/26/7 on a 26 Cu. Ft. safe.
- The first number is the long gun capacity in the safe body with a Half Shelf Interior (13 in the example).
- The second number is the long gun capacity in the safe body with an All Gun Interior (26 in the example).
- The “plus” number is the long gun capacity on the back of the door (+7 in the example).

**PLATINUM™**

**The Best of the Best.**

Premium Platinum safes are The Best There Is. Each is constructed using thicker 3/16" (7-Gauge) steel for added weight and pry resistance. ThermaBlock fire protection is designed to keep heat and flames at bay for two hours. The distinguishing feature of the Platinum is the handsome Grade VI cedar interior. Platinum safes are made in the USA.

### Features

#### SECURITY
- Heavy duty 3/16" (7-Gauge) steel body
- 9-1/16" Thick Duo-Formed® Door with full coverage 10-Gauge inner plate
- Uni-Port Locking System
- OmniBarrier® Lock Protection System
- Pry-Stop Corner Bolts extend diagonally from the corners of the door to protect against pry attack at the crucial corner areas
- 1-1/2” diameter chromed locking bolts on all four sides of door (top/sides/bottom)

#### FIRE PROTECTION
- ThermaBlock 1750° F/120 min.

#### APPEARANCE AND CUSTOMIZATION
- Automotive grade gloss finish in your choice of color
- Pinstriping and choice of graphic
- Grade VI cedar interior adds a luxurious quality to the safe
- Five-spoke handle in your choice of finish

#### STORAGE AND CONVENIENCE
- Premium DPX Storage System with Quick Access DPX Barrel Rack and Scope Saver
- Axis Adjustable Steel Shelving with Drawer and Access DPX Barrel Rack and Scope Saver
- Electrical Outlet allows electrical accessories to be added without taking apart power cords
- Interior LED lighting around the door frame makes locating items inside the safe much easier
- Elevated floor protects gun stocks

6 PLACE ORDER
SILVER®

Silver safes include all of our exclusive interior storage and convenience features at a very attractive price. A solid 11-Gauge steel body not only adds weight and strength for protection against break in, it also resists flex from heat and contributes to the 100 minute fire protection rating. Silver safes are made in the USA.

**Features**
- 11-Gauge Steel Body
- 1-1/16” Thick Duo-Formed® Door with full coverage 10-Gauge inner plate
- Fossil Defender® Locking System
- Hardened steel pin lock protection
- Pry-Stop End Bolts
- 1-1/4” diameter chromed locking bolts on all four sides of door (hinges/bottom)

**Options**
- 3 Locks
- 3 Hardware/Trim Colors
- 12 Finish Colors
- 11 Graphics or “No Graphic”

**APPEARANCE AND CUSTOMIZATION**
- Automotive grade gloss or napped textured finish
- Prestigious and choice of graphic
- Five-spoke handle in choice of finish
- Beige fabric interior

**Storage and Convenience**
- Premium OPX Storage System with Quick Access OPX Barrel Rack and Scope Saver
- High Capacity Barrel Racks exclude up to 13 long guns and offer quick access to 7 per rack
- Axis Adjustable Steel Shelving with Pistol Rack included
- Elevated floor protects gun stocks
- Electrical Outlet
- Interior Light Package

**Fire Protection**
- ThermaBlock 1680°/100 min.

Lock 'em Down.

Head 'em up and move 'em into a Rawhide safe. A tough 11-Gauge steel body and Pry-Stop End Bolts improve resistance to break-in. The excellent 1550° F/80 min. fire rating offers additional protection. A standout feature is the faux leather-trimmed interior that adds a touch of rugged class. A full DPX door storage rack adds storage while improving access to more long guns.

RAWHIDE
Features

SECURITY
- 11-Gauge steel body
- 1" Formed Door with inner plate
- Force Deflector™ Locking System
- Hardened steel pin lock protection
- Pry-Stop End Bolts
- 1" diameter chromed locking bolts on three sides of door (top/sides)

FIRE PROTECTION
- ThermaBlock 1550° F/80 min.

APPEARANCE
- Automotive grade gloss black or rugged textured saddle brown finish
- Dimensional cast emblem
- Three-spoke antique bronze handle
- Faux leather interior

STORAGE AND CONVENIENCE
- Premium DPX Storage System with Quick Access DPX Barrel Rack
- High Capacity Barrel Racks each store up to 13 long guns and offer quick access to 7 (per rack)
- CMS Adjustable Shelving
- Elevated floor protects gun stocks

Lock ‘em Down.

Head ‘em up and move ‘em into a Rawhide safe. A tough 11-Gauge steel body and Pry-Stop End Bolts improve resistance to break-in. The excellent 1550° F/80 min. fire rating offers additional protection. A standout feature is the faux leather-trimmed interior that adds a touch of rugged class. A full DPX door storage rack adds storage while improving access to more long guns.

ZERUST VCI PROTECTANT
- Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces
- Vapor Corrosion Inhibitors (VCI) have been used for years to protect metal parts in industrial and commercial applications
- One capsule protects a standard 30" wide (approximately 26 cu. ft.) safe for one year

VCI GUN SOCK
- Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt
- Overlays on motors are made easier by placing them in an upright position

VCI GUN SOCK - TWO PIECE
- Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt
- One capsule protects a standard 30" wide (approximately 26 cu. ft.) safe for one year
- Two piece design fits most breakdown rifles and shotguns

LED SAFE LIGHTING KIT
- The LED Safe Lighting Kit is the best aftermarket lighting solution available today
- The expandable, linear design places bright, long-lasting LED lighting anywhere in the safe
- A motion sensor turns on the lights when the door opens and automatically shuts them off after 30 or 60 seconds with no motion or when the door closes
- Each kit comes complete with six LED light tubes, six AA batteries, mounting clips with hook and loop tape, A/C adaptor and a motion sensor power module

DPX ACCESSORIES
- Take full advantage of the DPX storage system with these accessories
- Store more guns without taking up shelf space with DPX Handgun Pouches (sold in sets of two)
- Store shorter firearms and make them easily accessible with DPX barrel loops and DPX stock risers

- Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces.
- Vapor Corrosion Inhibitors (VCI) have been used for years to protect metal parts in industrial and commercial applications.
- One capsule protects a standard 30” wide (approximately 26 cu. ft.) safe for one year.

VCI GUN SOCK
- Protects the entire firearm enclosure around the firearm from moisture where oils cannot reach.
- Drawstring closure.

VCI GUN SOCK - TWO PIECE
- VCI (Vapor Corrosion Inhibitor) penetrates into the smallest crevices and drives out moisture where oils cannot reach.
- Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt.
- Drawstring closure.

DPX ACCESSORIES
- Take full advantage of the DPX storage system with these accessories.
- Store more guns without taking up shelf space with DPX Handgun Pouches (sold in sets of two).
- Store shorter firearms and make them easily accessible with DPX barrel loops and DPX stock risers.

DPX Handgun Pouch
- 31.00
DPX Barrel Loop
- 23.00
DPX Stock Riser
- 23.00

LED SAFE LIGHTING KIT
- The LED Safe Lighting Kit is the best aftermarket lighting solution available today.
- The expandable, linear design places bright, long-lasting LED lighting anywhere in the safe.
- A motion sensor turns on the lights when the door opens and automatically shuts them off after 30 or 60 seconds with no motion or when the door closes.
- Each kit comes complete with six LED light tubes with six LEDs per tube, three flexible connectors, mounting clips with hook and loop tape, A/C adaptor and a motion sensor power module.

VCI GUN SOCK
- VCI (Vapor Corrosion Inhibitor) forms a protective vapor enclosure around the entire firearm.
- Adds protection to all metal items in an enclosed gun safe or cabinet.
- Drawstring closure.

VCI GUN SOCK - TWO PIECE
- Two piece design fits most takedown rifles and shotguns.

BOLTED SPECIAL PAGE 126-127
### EVERDRY™ ELECTRIC DEHUMIDIFIER
- The EverDry Electric Dehumidifier removes humidity from the interior of a safe and protects against rust.
- The 18" long EverDry should be used on safes 30" wide and larger.
- Cord is removable for installation.
- One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30" wide safe.

### FLEXIBLE EVERDRY™ DEHUMIDIFIER
- The Flexible EverDry is flat and easily bends.
- Takes up less space and makes installation easier, especially in small safes.
- Removes humidity from the interior of a safe and protects against rust.
- Plug is removable for installation.

### S&G® ELECTRONIC LOCK RETROFIT KIT
- The S&G Electronic Lock is an advanced security solution manufactured by the leader in the lock industry.
- Kit includes lock and installation DVD (installation by a professional locksmith is recommended).
- Includes many technical security features.

### SECURAM™ SCANLOGIC BIOMETRIC LOCK RETROFIT KIT
- The Securam ScanLogic Biometric Lock removes the uniqueness of an individual fingerprint as the combination in this advanced security solution.
- The lock opens with either a fingerprint or a multi-digit code.
- It is highly secure and operates very quickly.
- Simple programming instructions.
- LCD Screen (installation by a professional locksmith is recommended).
