Strong, rugged bolts set us apart from the competition.

To offer protection from thieves and untrained hands, a gun safe must offer robust protection. Browning ProSteel safes call on industry-standard locks, steel hardplate lock protection and precision-made diversion bar locking systems to guard against pry, punch and drill attacks. Tried and true round bolts are chrome plated for smoothness and attached to the bolt bar with a combination of heavy-duty hardware and strong, professional welds.
Go to browning.com to build the Browning ProSteel safe you want, get a price estimate and send your order straight to your dealer.

Begin by selecting the safe that meets your needs from our wide selection. From tough, budget-friendly models to top-tier safes that maximize protection and finish options, there's a Browning ProSteel safe right for you.

Choose the finish or paint color you want. Most safes are available with either a rugged textured finish or automotive-grade painted finish.

Select the hardware that complements the safe finish and the decor of your home.

Select from dial, electronic or biometric lock models.

Add the extra shelves and interior accessories you need to maximize protection and storage potential inside your safe.

Many of the best features of Browning ProSteel safes are those you will never see. While the locking mechanisms incorporated into your safe go unnoticed day to day, foes will certainly find them virtually unassailable. Lock protection systems are designed to divert forces away from the lock. Corner protection is strategically added to these frequently attacked areas and, unlike some of our competition, we still use high-strength steel bolts to secure the door instead of shaped sections of angle iron. All this protection is housed in a sturdy body and door that feature continuous welds to eliminate weak points.

**UNI-FORCE™ LOCKING SYSTEM**

The finest Browning ProSteel safe locking mechanism uses robust cam locks and a large, multiple diversion bar system to prevent bolt or handle pressure from reaching the lock. Forces go to the cams and diversion bars, not the lock, for protection unmatched by other locking systems.

**FORCE DEFLECTOR™ LOCKING SYSTEM**

The Force Deflector Locking System (U.S. patent #7,665,405) prevents bolt or handle forces from reaching the lock by using a rotating cam device. It prevents energy transfer to the lock better than most systems used in the safe industry.

**PRY-STOP CORNER BOLTS**

Pry-Stop Corner Bolts (U.S. patent #8,276,527) provide better protection than other pry-defense designs. Innovative long locking bolts extend diagonally from a reinforced support at the corners of the door to protect against pry attack at the corner areas.

**PRY-STOP END BOLTS**

Pry-Stop End Bolts are over two and one-half times longer and attach to a high strength steel angle iron that prevents the locking bolt support bar from bending in a pry attack. The top and bottom locking bolts on the door side secure the critical door corners.

**OMNIBARRIER® LOCK PROTECTION SYSTEM**

A carefully engineered structure of steel hard plate and steel components designed to protect the safe lock from drill, punch and push attacks.

**DUO-FORMED DOOR**

The best Browning ProSteel safe door is made from multiple layers of steel formed together to provide superior strength, pry resistance and attack protection. A full second panel offers outstanding strength and rigidity. The door face is 1-11/16” thick.

**FORMED DOOR**

The Formed Door is engineered with a rugged steel face. Back and reinforcement panels provide excellent strength and attack protection compared to the competition.

**REINFORCED DOOR FRAME**

The door opening of the safe is strengthened by an integrated return flange to create added pry and attack resistance.

**180° HEAVY DUTY HINGES**

Rugged exterior hinges allow the door to swing open 180° for unhindered access to the safe interior. Door locking bolts maintain security if the hinges are cut off. External hinges eliminate the need to remove insulation for improved fire protection.

Protection that you can rely on.
2 to 3 times more fire protection with ThermaBlock technology.

When it comes to fire protection and gun safes, the devil truly is in the details. Door hinge style may seem like a small detail, yet it is crucial to fire protection. An internal hinge requires fire protection material be removed where the hinges attach. In a fire, the unprotected hinge areas allow the internal temperature of a safe to rise faster, and to a significantly higher temperature, than in a Browning ProSteel safe with no unprotected areas.
The exclusive Axis Adjustable Shelving (U.S. patent #D662341) is a completely customizable system with an array of shelves that can be configured to meet virtually every need. The Axis shelf is made from a single piece of sturdy steel covered in a soft, protective silicone rubber that is highly durable and designed to protect guns and valuables. This design also adds a sleek appearance to the safe interior. Axis accessories, featured on the next page, are designed to easily mount to the solid steel shelf or barrel rack. (Compatible with safes that feature Axis Adjustable Shelving built in 2013 or later.)

CMS Adjustable Shelving

CMS Shelves are built upon a tough steel frame and utilize a wood platform covered in soft carpet. CMS borrows essential components from the patented Axis Adjustable Shelving (U.S. patent #D662341) to retain much of the adjustability of the higher-end system. Like Axis, CMS can be adjusted up and down, side to side, added and removed to fit a wide range of valuables.

The safe industry’s smartest storage solutions are now even more versatile.

Browning ProSteel safes offer the most versatile interiors in the industry, allowing for more storage and better organization of your valuables.

To maximize storage and improve organization, a variety of specialized accessories are available for Browning ProSteel safes with Axis Adjustable Shelving and now CMS Adjustable Shelving. All Axis accessories shown are compatible with safes built in 2018 and newer that feature CMS Adjustable Shelving and are greater than 20 cubic feet in size.
Patented adjustable shelving creates unmatched convenience and storage solutions.

While a gun safe appears cavernous on the sales floor, the empty space inside vanishes fast the moment you begin filling it with your valuables. Long guns, carbines, handguns, watches, laptops, savings bonds and the list goes on. Adding the accessories shown on this page allows you to explore the full potential of your Axis or CMS interior equipped safe by customizing it specifically to your needs.
CAPACITY COMPARISON

As you browse through this brochure you will see numbers such as 13/26+7 listed under "long gun capacity." The first number is the long gun capacity in the safe body with a half shelf interior (13 in the example). The second number is the long gun capacity in the safe body with an all gun interior (26 in the example). The "plus" number is the long gun capacity on the back of the door (+7 in the example).

More space and better organization with the best door storage system in the industry.

The patented DPX storage system (U.S. patent #7,409,790) is available exclusively on Browning ProSteel safes. This unequalled organizational tool allows long guns, handguns, shooting gear and valuables to be stored on the back of the safe door. The DPX Quick Access Barrel Rack puts long guns on the door for instant access and the available Scope Saver increases storage and protects optics. DPX pouches and pockets keep valuables and gear where they are easy to find and free up shelf space for even more items.

DPX PISTOL POUCHES
Keep handguns easy to access and isolated from bumps and scratches in the sewn-on pouches on the DPX panel.

DPX QUICK ACCESS BARREL RACK
Flexible polymer wings protect the barrel finish, secure the barrel in place and allow firearms to easily be pushed into or pulled from the rack. (U.S. patent #D643500)

DPX SCOPE SAVER
Store more long guns with optics on the DPX door rack with the patented Scope Saver. This unique recessed panel protects scopes and increases gun capacity.
How do Browning ProSteel Safes hold 54% more long guns?

USE THESE HELPFUL HINTS TO MAXIMIZE SPACE:

1. Set guns on the toe of the recoil pad and allow them to lean slightly forward. Resting guns on the heel of the stock and tipping them back uses up valuable space on the floor of the safe.

2. Place guns without optics on the back row, against the back wall of the safe. This frees up space for scoped firearms on the outer row.

3. Place long guns “heel-to-toe” to store the maximum amount of guns. On the back row, be sure the gun’s heel is pressed against the back wall. On the outer row make sure the firearm is touching the toe of the gun on the back row.

4. Group similarly-sized firearms together and adjust barrel racks to find the balance point of the firearms to keep them as vertical as possible.

5. If the safe is not equipped with a Scope Saver on the DPX Barrel Rack, place often reached for guns without optics on the door to free up space for scoped long guns on the outer row. Firearms with large optics or optics with large adjustment turrets may not fit in the Scope Saver.

“Heel-to-toe” configuration allows door to close without interference and maximizes storage space.

We go the extra mile to ensure that you are proud of the finish on the safe you choose. The fully-welded steel body provides a smooth, consistent appearance. Automotive-grade paint finishes are expertly applied and baked on for added durability. Textured finishes offer a tougher appearance without sacrificing great looks. Beautiful graphic options lend a personalized flair to higher-end models. Whether in the garage, basement or den, a Browning ProSteel safe is sure to turn your head every time you walk into the room.

# BLACK LABEL MARK V SERIES

## CORE COLLECTION

![Image](image_url)

### MP49
- **49 long guns (26/39+10)**
- **33 cubic feet**
- **620 lbs.**
- **8 total locking bolts (5 active)**
- **Exterior: 58” x 41” x 24”**
- **Interior: 53” x 38-1/2” x 17”**
- **5 CMS Shelves**
- **3 High Capacity Barrel Racks**
- **1 Pistol Rack**

### MP33
- **33 long guns (13/26+7)**
- **23 cubic feet**
- **520 lbs.**
- **8 total locking bolts (5 active)**
- **Exterior: 58” x 29” x 24”**
- **Interior: 53” x 26” x 17”**
- **4 CMS Shelves**
- **2 High Capacity Barrel Racks**
- **1 Pistol Rack**

## THERMABLOCK FIRE PROTECTION
- 1,400° F for 60 minutes
- 1-1/2” ceiling insulation, 1” body insulation, 1” door insulation

## APPEARANCE
- Matte black finish
- Blackout American flag graphic
- Single drop handle in black finish
- Beige fabric interior

## STORAGE AND CONVENIENCE
- Full DPX Storage System with Quick Access DPX Barrel Rack
- CMS Adjustable Shelving
- Two Carbine Barrel Loops
- Elevated floor protects gun stocks

## SECURITY
- 12-gauge steel body
- 1” Formed Door with partial inner plate
- Force Deflector™ locking system
- Hardened steel pin lock protection
- 1” diameter chromed locking bolts on three sides of door (top/sides)

Three-spoke handle in black chrome finish

Beige fabric interior

DPX Storage System on top half of door with Quick Access DPX Barrel Rack (SP20 and SP9 do not include DPX Barrel Rack on door)

CMS Adjustable Shelving (SP23, SP20 and SP9 have standard shelving and are not Axis or CMS compatible)

High Capacity Barrel Racks

Elevated floor protects gun stocks

1. CMS
   - CMS Adjustable Shelving

2. DPX
   - Half DPX Door Panel
   - Quick Access Barrel Rack

3. PRY-STOP BOLTS
   - Adds pry resistance to door corners
The minimum rough door opening for the Standard Vault Door is 83” x 36”
- External L-frame with 1/2” diameter steel J-bolt anchors (included) can be poured in place in new construction or installed in an existing door frame by using expansion anchors or lag bolts (not included)

The minimum rough door opening for the Clamshell Vault Door is 82” x 40”
- Clamshell flange design includes an internal and external flange for additional security and improved appearance
- Can be secured into an existing door frame using the clamshell flange or, for additional security, using expansion anchors or lag bolts (not included)
- Clamshell flange has a 3-1/2” range of adjustment to fit walls with a minimum thickness of 8” to a maximum thickness of 11-1/2”

STANDARD SPECIFICATIONS
The minimum rough door opening for the Security Door is 83” x 36”
- Available in primer finish only
- Not compatible with mechanical locks

STANDARD DOOR DIMENSIONS - TOP VIEW
- 38-1/8”
- 30-5/8”
- 6”
- 35-1/2”

STANDARD OUT-SWING
- 645 lbs.
- 22 total locking bolts
- Exterior: 84” x 38-1/8”

CLAMSHELL OUT-SWING
- 800 lbs.
- 24 total locking bolts
- Exterior: 83-3/8” x 42-3/4”

CLAMSHELL IN-SWING
- 800 lbs.
- 24 total locking bolts
- Exterior: 83-3/8” x 42-3/4”

SECURITY DOOR
- 500 lbs.
- 20 total locking bolts (10 active)
- Exterior: 83” x 38-1/8”
- 2” of insulation

Internal Lock Release
Convenient Security.

Having a handgun-sized, locking pistol vault is a wise investment. The Browning ProSteel PV Portable is ideal for securing valuables that are used daily such as a watch, rings, wallet or concealed carry firearm.

PISTOL VAULT

- Exterior: 2-1/4" H x 10" x 8-1/4"
- Weight: 6 lbs.
- Body Thickness: 16-gauge

APPEARANCE

- Hammer gray finish
- Flexible pistol grippers help secure and protect contents

SECURITY

- 16-gauge steel
- Secure barrel key lock
- Cable included for added protection against theft

Hammer Gray
Maximum Potential.

Maximize the potential of your safe with our extensive line of safe accessories. These accessories are designed to help you store more gear and guns, better organize safe interior space, add lighting to make items easier to locate and ensure that your possessions are protected from humidity.

DOOR ORGANIZERS

Browning safe door organizers increase gun capacity, free up shelf space and improve organization in the safe by utilizing the inside surface of the door. Frequently used guns and valuables can be stored on the door for fast access. Accommodates a wide range of long guns. Document pouch keeps important papers within easy reach. MOLLE System straps allow for versatile storage options for handguns and is compatible with any MOLLE pouch, holster or strap.

TAKE FULL ADVANTAGE OF THE DPX STORAGE SYSTEM WITH THESE ACCESSORIES:

HANDGUN POUCH

Store more guns without taking up shelf space with DPX Handgun Pouches (sold in sets of two).

BARREL LOOP

Barrel Loops allow shorter firearms to be secured on the DPX Door Panel.

STOCK RISER

Store shorter firearms on the DPX Door Panel and keep them easily accessible.

SMALL

- Size: 14" W x 48" H
- Two handgun pouches
- One document pouch
- Two long gun (up to 47" long) storage pouches and barrel straps

MEDIUM

- Size: 20" W x 48" H
- Three handgun pouches
- One large document pouch
- Three long gun (up to 47" long) storage pouches and barrel straps
- One multipurpose pouch

LARGE

- Size: 27" W x 48" H
- Four handgun pouches
- Two document pouches
- Four long gun (up to 47" long) storage pouches and barrel straps
- Two multipurpose pouches
USER-INSTALLED ACCESSORIES

LED SAFE LIGHTING KIT
- Browning ProSteel factory-style LED Safe Lighting Kit is easily installed in the door frame
- Motion sensor activates the lights when the door opens and automatically shuts off after the door closes
- Includes eight LED light tubes, mounting clips, AC adaptor and motion sensor

LED LIGHT
- This battery-powered LED Light adds 75 lumens of bright light to the safe interior
- Motion sensor activated
- Attaches with hook and loop fasteners
- Requires 3 AA batteries (not included)

BOLT DOWN HARDWARE KIT
- Includes four lag screws for anchoring to wood floors and four concrete bolts and concrete anchors for securing to concrete
- Wood and concrete drill bits are also included

PISTOL RACKS
- 4-GUN/6-GUN
- Store handguns more efficiently
- Increases storage space on shelves
- Access to handguns is made easier by placing them in an upright position

S&G® ELECTRONIC LOCK RETROFIT KIT
- The S&G Electronic Lock is an advanced security system manufactured by the leader in the lock industry
- Includes many technical security features
- Kit includes lock and installation DVD
- Available in silver chrome (shown), black chrome and gold
- Installation by a professional locksmith is recommended

SECURAM™ BIOMETRIC LOCK RETROFIT KIT
- The SecuRam ScanLogic Biometric Lock uses the uniqueness of an individual fingerprint as the combination in this advanced security solution
- The lock opens with either a fingerprint or a multi-digit code
- Highly secure with quick operation
- Simple programming instructions
- LCD Screen
- Available in silver chrome (shown), black chrome and gold
- Installation by a professional locksmith is recommended

NEW

NEW
**DRY-ZONE MOISTURE REDUCER**
- Absorbs moisture without electricity and is rechargeable in an oven
- One 500-gram box protects up to 37 cubic feet of enclosed space, about the volume of a standard 30” wide safe
- Can be reactivated indefinitely

**EVERDRY™ ELECTRIC DEHUMIDIFIER**
- The EverDry Electric Dehumidifier removes humidity from the interior of a safe and protects against rust
- The 18” long EverDry should be used on safes 30” wide and larger
- Cord is removable for installation

**ZERUST VCI PROTECTANT**
- Small capsule emits an invisible vapor that forms a corrosion- and rust-resistant barrier on metal surfaces
- Vapor Corrosion Inhibitors (VCI) have been used for years to protect metal parts in industrial and commercial applications
- One capsule protects a standard 30” wide safe (approximately 26 cu. ft.) for one year

**FLEXIBLE EVERDRY™ DEHUMIDIFIER**
- Flat and bendable
- Takes up less space and makes installation easy, especially in small safes
- Removes humidity from the interior of a safe and protects against rust
- Plug is removable for installation
- LED indicates unit is operating

**VCI GUN SOCK**
- Vapor Corrosion Inhibitor (VCI) penetrates into the smallest crevices and drives out moisture where oils cannot reach
- Provides full protection by forming a vapor enclosure around the firearm from muzzle to butt
- Drawstring closure
- Gives additional protection to all metal items in an enclosed area such as a gun safe or cabinet
- Fits rifles and shotguns 48” to 56”

**VCI GUN SOCK (TWO-PIECE)**
- Vapor Corrosion Inhibitor (VCI) forms a protective vapor enclosure around the entire firearm
- Adds protection to all metal items in an enclosed gun safe or cabinet
- Drawstring closure
- Two-piece design fits most takedown rifles and shotguns
